CLEARLY CLEAN RESULTS

1000 KW

The Dirt Water Collector

The dirt water collector 1000 KW is used in workshops for cars, trucks, and any other vehicles to collect dirt water.

The collector is mobile and can be pushed on the ground under (almost) every vehicle. Given its extendable frame with wheels the collector the width can be adjusted to fit into every pit.

Collects dirt water	✓ Mobile and flexible ✓ Both climate friendly and health friendly ✓ Fits under (almost) every car, truck, or bus, and into any pit
Garages for cars, trucks, busses etc.	✓ Extendable frame and wheels => fits into every pit ✓ For cleaning jobs on brakes, and at or under the chassis ✓ For cars, utility vehicles, tanks, trains, ships, helicopters…
Fleet management	✓ Ideal for utility vehicles: Public transport, movers… ✓ For companies with environmental conscience ✓ Reduction of travel times around the pit

Technical Data 1000 KW

- Mobile and independent
- Fits into every workshop, under (almost) every chassis, and due to adjustable wheel axes also into every pit
- Slop break against slopping of dirt water during transport

Technical Data	1000 KW
Filling capacity	Up to 90 liters
Load capacity	Up to 80 kg
Transport capacity	Up to 50 kg
Dimensions grating Outside dimensions without handle Outside dimensions including handle	885 x 585 x 15 mm 950 x 780 x 340 mm 1300 x 780 x 830 mm
Pit width	730 - 1140 mm
Weight (empty)	30 kg
Material (collector)	Glas fibre
